

TROY BURNEY

Senior Software Engineer (DevOps / R&D) | Washington, DC Metro Area | troy.burney@gmail.com

ABOUT

A developer-first Senior Software Engineer. For 15+ years, I've specialized in R&D and rapid prototyping, transforming concepts into pilot systems across Federal, Commercial, and Enterprise industries. Turning "what if..." and "is it possible?" into OPERATIONAL REALITY.

CORE COMPETENCIES

R&D & Rapid Prototyping • End-to-End Software Delivery • Full-Stack System Architecture
Cloud Infrastructure & DevOps • Innovation & Problem Solving • Backend & API Development

TECHNOLOGY

Programming & Scripting	RESTful APIs, Java, Maven, Gradle, Python, JavaScript, React, HTML5, Bootstrap, jQuery, SQL
Frameworks & Databases	Spring Boot, Spring MVC, Django, Flask, MySQL, Oracle, Snowflake, PostgreSQL
DevOps & Delivery	GitHub, GitLab, Gitea, Jenkins, Python, Groovy, Selenium, Ansible, Nexus OSS 2 & 3, Bash
Infrastructure & Operations	Linux (Ubuntu, RHEL), Windows Server, Okta (SSO, Lifecycle Management, Universal Directory), Networking (Firewalls, DNS, VPN), Jira, ServiceNow
Cloud & Containerization	AWS (EC2, VPC, Route 53, RDS, CloudWatch), GCP (Compute Engine, VPC, Cloud DNS, Persistent Disk, Firewall Rules), Digital Ocean, Docker, Compose, DockerHub

EDUCATION

North Carolina Agricultural & Technical State University / Bachelor of Science in Computer Science / DEC 2008

EXPERIENCE

Valorant Digital / AI Platform Engineer / 2020 - Current

Engineered a full-stack AI platform (Aria OS) that scales marketing agency content output 5-10x with total brand consistency.

- Architected a "Mini-Me" personalization system to guarantee a flawless, on-brand voice from a brand's unique DNA.
- Designed a central control panel for non-technical users to manage and configure brand-specific inputs for the AI engine.
- Developed and operated a secure public-facing cloud infrastructure hosting a Dockerized AI platform with 99.9% uptime.
- Engineered Java APIs to power sophisticated prompt-generation engines for the Gemini AI, guaranteeing high-quality output.

Booz Allen Hamilton / Cloud Integration Engineer (USPS, IRS) / 2019 - 2020

Led experimental development activities integrating Okta centralized identity into technologies of interest across the Postal Service.

- Spearheaded multi-app Okta single sign-on integration for mobile device applications supporting USPS facility operations.
- Integrated authentication and authorization using Okta into React, WordPress & mobile apps for unified identity management.
- Automated real-time identity synchronization between on-premise Active Directory and Okta, for streamlined user access.

Created proof-of-concepts exploring diverse digital submission options for IRS Form 1099, streamlining data capture processes.

- Developed dynamic React user interfaces with form wizard capabilities, optimizing digital submission process for key tax data.
- Leveraged low-code tooling to rapidly deploy tax submission pathways, enabling data intake with minimal developer overhead.
- Implemented data ingestion system to process batches of federal tax data, delivering reliable input for downstream systems.

Sapient / DevOps Engineer (FDA) / 2017 - 2018

Managed mixed-OS infrastructure and CI/CD toolchains for federal systems, driving software deployments across all environments.

- Configured Jenkins pipelines for automated compilation, testing, and artifact publishing to Nexus in dev/test environments.
- Managed change management processes for production infrastructure, configurations, and deployments via ServiceNow.
- Maintained Windows and Linux dev/test servers and oversaw stability of production infrastructure hosting inspection systems.

Carr Astronautics Corporation / Java Data Visualization Developer (NWS) / 2015 - 2016

Created a proof-of-concept platform using RESTful APIs and CesiumJS to visualize multi-band satellite weather data temporally.

- Implemented Java backend layer to automate multi-destination delivery of converted satellite imagery for visualization.
- Built RESTful APIs for on-demand satellite imagery access, configurable by spectral bands, coordinates, and time parameters.
- Developed interactive 3D visualizations with CesiumJS and RESTful APIs enabling temporal satellite imagery exploration.

Accenture / Big Data Engineer (DHS S&T, ICE) / 2014 - 2015

Led Elasticsearch operations to enable dashboard reporting and agent investigation activities within a large-scale data environment.

- Managed Elasticsearch infrastructure in dev/test environments, supporting dashboard and analytical activities from data feeds.
- Built Logstash ETL pipelines, transforming and loading sensitive investigation data into multi-tenant Elasticsearch nodes.
- Enhanced investigative workflows with Kibana and Shield, creating tailored data visualizations for specific user communities.

Avnet / IBM WebSphere Commerce Developer / 2013 - 2014

Led WebSphere Commerce integrations, connecting client systems and rich media for engaging online retail experiences.

- Built Commerce Composer widgets with dynamic imagery and media carousels to enhance user experience on product pages.
- Customized WebSphere Commerce internals to integrate client-specific widgets, content, and product detail requirements.
- Developed WebSphere Commerce data mappings, integrating near-live client feeds for accurate product and rich media display.

Hewlett Packard / Business Intelligence Developer II / 2009 - 2013

Developed and automated comprehensive business intelligence systems, driving data-driven decisions across the enterprise.

- Developed custom ingestion systems, coordinating with enterprise tech leads to ingest and centralize disparate project data.
- Led numerous proofs-of-concepts, setting up and assessing dashboard analytics and reporting platforms for the organization.
- Streamlined critical data reporting processes through automation, allowing business users to focus on primary duties.

CODE & CREATIONS

Talking is easy, and I prefer to show, not tell. Here are the artifacts: APIs, web apps, tools, experiments, and other situations I've built over the years. Head over to my links portal: <https://links.softwareshinobi.com>
